SUMMARY

AI Full-Stack Engineer and Computer Science engineering student passionate about building scalable web applications and intelligent software that solve real-world problems. I combine modern full-stack development with AI integration and automation to deliver performant, user-focused digital experiences.

TECHNICAL SKILLS

Frontend: React, Angular, React Native, TailwindCSS
Backend: Node.js, Express.js, Spring Boot, REST APIs
Databases: PostgreSQL, MongoDB, Prisma ORM
AI / Automation: Python, n8n workflow automation
Tools: Git, GitHub, Postman, Figma
Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Yajoura — Project Management Platform | Full-Stack Developer Intern (Final-Year Internship) Feb 2025 – Jun 2025
Developed a full-stack project management platform during a final-year internship, working within an Agile Scrum team to deliver a React and Node.js solution featuring Kanban-based task management, real-time collaboration, time tracking, and KPI dashboards.
Technologies: React, TailwindCSS, Node.js, Express.js, Prisma ORM, PostgreSQL

Tech News Extraction Agent — *Summer Intership* Jun 2026
Built an automation agent that scrapes and aggregates tech news from multiple sources, filters and categorizes articles by topic, and delivers a daily digest with zero manual curation.
Technologies: Python

PROJECTS

OliveRAR — Intelligent Olive Harvest Management System — *Academic Project* Mar 2026 – May 2026
Built a full-stack platform that gives agricultural cooperatives one place to plan orchard schedules, allocate workforce, and monitor yields replacing scattered manual tracking with real-time KPI dashboards and automated operational workflows, delivered through Agile Scrum sprints.
Technologies: Spring Boot, Angular, MongoDB, n8n, GitHub

ARSII — Team Management Mobile App — *Hackathon Project (24h) — AI Night Challenge* Feb 2026
Built a mobile app in 24 hours that gives teams a single place to assign work, see progress in real time, and stay coordinated without status-check meetings or scattered chat threads.
Technologies: React Native, TailwindCSS, Node.js, Express.js, PostgreSQL, Prisma ORM

Candidate Registration Automation Agent — *Hackathon Project (24h) — CS SYP HIZE, 3rd Place* Apr 2026
Built an end-to-end automation pipeline in 24 hours that processes candidate registrations, deduplicates entries, generates personalized QR codes, and sends confirmation emails with zero manual intervention — placing 3rd among 10 teams at CS SYP HIZE.
Technologies: n8n, Google Sheets API, Gmail API

JCI Sakiet Ezzit Website — Production Web Platform — *(Volunteer Project)* Nov 2025 – Nov 2025
Designed, developed, and deployed the official website for JCI Sakiet Ezzit, enabling online membership registration and providing a production-ready platform used by the organization.
Technologies: React , TailwindCSS , Netlify

EDUCATION

Engineering Degree in Computer Science — ISIMS, Sfax, Tunisia Sep 2025 – Present
Bachelor's Degree in Computer Science — ISIMS, Sfax, Tunisia Sep 2022 – Jun 2025

CERTIFICATIONS

- Introduction to Workflow Automation with n8n — DataCamp
- Intermediate Workflow Automation with n8n — DataCamp
- Agentic AI — DevMastery School

LANGUAGES

Arabic: Native | French: B2 | English: C1

VOLUNTEERING & LEADERSHIP

- Treasurer, JCI Sakiet Ezzit (2024) — Managed organizational finances and budgets.
- Awards Advisor, JCI Sakiet Ezzit (2023) — Coordinated award nominations and recognition programs.
